Dear Mr. Walker,

I liked it when we were
in the computer lab when you said
 $7 \times 7 + 1 - 19 + 50 + 100$ then take a
square route. I liked all of your
strategies. I was inspired of the
thing that you knew. I liked
it when you new the kids birthday.
I also liked the games you
played with us.

Your Student
Rigel Rush

Dear Mr. Willie Walker,

Thank you for visiting William Ramsay and showed us your different kinds of strategies. I'm really inspired about what you did in the computer lab and in the auditorium. I wish that when I'll grow up I will be just like you.

Sincerely yours
Angely Tomuad

Dear Mr. Math,

Yesterday was fun and I was surprised how you said alot and the fourth and fifth graders got the answers fast! How do you do that? I think I know the answer **WE GOT TO KNOW OUR MULTIPLICATION FACTS!** I really don't know what to say about those stuff!

Love,

Laura

Dear Mr. Math,

Thank you for coming to our school William Ramsey Elementary, and teaching us better math strategies. It was fun watching your games like the buzzing one, it also fun to play around in the audience. Some people were cheating in the audience by asking the teachers. I thought your teaching was "incredible" and also intelligent.

Yours truly, ~~Sikandar~~

Dear Mr. Math,

I really liked how you showed other kids how to multiply. Even if I didn't understand something you said I still liked how you taught other kids. I wish I could have been in the lab with you. But I still need to work on my multiplication and division. I hope next time you come I could be with you. I think you inspired me in to working harder. I really like the game that you have to clap and buzz that was my favorite part. I really think you encouraged me a lot.

Sincerely,

Liliana Reyes
